§3.5 Entry Ticket: Inverse Functions

Name: _____ Date: _____

1. For each function, is it one-to-one (does it pass the horizontal line test)? Give its domain and range.

function	one-to-one?	D	R
$y = x^2$			
$y = x^2, \quad x \geqslant 0$			
$y = \sin x$			
$y = \sin x, \quad -90^\circ \leqslant x \leqslant 90^\circ$			

2. Graph $y = x^2,\ x \geqslant 0$, and its inverse, then write the equation of the inverse. The line $y = x$ is drawn for you.

Equation of the inverse: $y =$ _____
