3.4 Graphs of Secant and Cosecant

Recall: 3.3 and 3.6

Name _____ **Solo – 9 minutes**

1. For $y = 3\cos(2x) - 1$, find a, k, the period, the midline ML and the range.

2. For $y = \dfrac{1}{x-2}$, find the vertical asymptote (VA), the horizontal asymptote (HA) and the sign of y on each side of the VA.

3. Fill in the table.

x	0°	60°	90°	120°	180°
$\cos x$					
$\dfrac{1}{\cos x}$					

What does the graph of $y = \dfrac{1}{\cos x}$ do near $x = 90^\circ$?
